FARHAN ADITYA

+6285920754983 | farhanaditya134@gmail.com | https://www.linkedin.com/in/farhanadityaa/

I'm Farhan Aditya. I'm studying Information Systems at Universitas Terbuka to learn more about technology. I work as a programmer at Lamjaya. I create and fix software that helps businesses work better. Passionate about coding and continuous learning, I enjoy tackling challenging problems and delivering efficient, scalable applications.

Work Experiences

Indo Raya Tenaga (Procurment) - PT Lamjaya Global Solusi - **Jakarta** — Oct 2025 - Present

Programmer

I contributed to the development of the Contract & Procurement System for PT Indo Raya Tenaga, an internal application designed to manage contract lifecycle, purchase orders, and vendor relationships in a structured and approval-based workflow.

- Contract Management: End-to-end contract creation, review, and approval workflow.
- Contract Drafting: Online contract drafting and editing directly within the web application.
- Purchase Order: Structured PO creation and approval integrated with contract and vendor data.
- Vendor Invitation: Vendor onboarding invitation with a defined approval flow.
- Vendor Update: Vendor data update requests with review and approval mechanism.
- Role Management: User access control based on roles across all modules.

PT Patra Jasa (Compliance Management System) - PT Lamjaya Global Solusi - **Jakarta** — Nov 2024 - Feb 2025

Lead Programmer

I was involved in the development of the Compliance & Legal System for PT Patra Jasa, an internal application designed to centralize, standardize, and document employee compliance and legal processes. This system plays a key role in supporting KPI evaluation and ensuring governance aligns with corporate regulations.

- Creation, Review & Approval of Compliance Forms: Including Gratification, Conflict of Interest (COI), Code of Conduct (COC), and LHKPN forms integrated with employee KPI calculations.
- Agreement Management: The digitalization process of creating, reviewing, and approving various types of agreements.
- Legal Document Request: The process of requesting documents with a review and approval flow by the Legal team.
- Dynamic SLA & PIC Setting: SLA, PIC, and approval flow settings that can be adjusted even when the ticket is running (runtime adjustment).

PT Dharma Satya Nusantara TBK (Tax Filling) - PT Lamjaya Global Solusi - **Jakarta** — Jun 2024 - Oct 2024

Lead Programmer

I contributed to the development of Tax Filing, an internal system for PT Dharma Satya Nusantara Tbk, designed to manage tax documents across multiple entities (multi-company) in an efficient, automated, and structured manner. The system leverages OCR technology and enables automated reconciliation between document data and Excel-based data sources.

- Multi-Company Document Upload: Supports uploading tax files from various business units in one platform.
- OCR Extraction (Tesseract): Automatic extraction of important information from PDF/image-based tax documents into a PostgreSQL database.
- Import Excel: Users can upload Excel files containing reference data to be reconciled with the OCR extraction results.
- Data Reconciliation: Automatic matching between OCR data and data from Excel to ensure the validity and accuracy of reporting.
- Reporting: Presentation of tax reports based on certain filters (period, entity, reconciliation status).
- Role Management: User access rights management system based on roles (Admin, Reviewer, Tax Officer, etc.).

PT Dharma Satya Nusantara TBK (Tax BC) - PT Lamjaya Global Solusi - **Jakarta** — Jan 2023 - Jul 2023

Programmer

I developed the Tax BC system for PT Dharma Satya Nusantara Tbk, a web-based internal application designed to efficiently and automatically manage tax documents across multiple company entities (multi-company). The system integrates OCR technology (Tesseract) to extract text from tax documents, stores the data in a PostgreSQL database, and synchronizes it with the company's SAP system for seamless integration.

- Multi-Company Document Upload: Upload tax documents from multiple subsidiaries in one integrated system.
- OCR Extraction with Tesseract: Automatic extraction of text from documents (PDF/image) into a database structure.
- Integration to SAP: Synchronize tax data to SAP systems to ensure compliance and operational efficiency.
- Reporting: Tax data reports based on time filters, document types, and company entities.
- Export to Excel: Feature to export extracted data to Excel format for audit and manual reporting needs.

PT. Asuransi Tugu Pratama Indonesia (Compliance Group — Jan 2023 - Jul 2023

Management Information) - PT Lamjaya Global Solusi - Jakarta

Programmer

Developed a web-based Compliance Management System for PT Asuransi Tugu Pratama Indonesia using Laravel, replacing manual spreadsheets. Key features included compliance reporting, role-based access, real-time dashboards, and automated OJK reporting. Improved reporting efficiency by 80% and reduced admin errors by 65% within 3 months.

PT Merdeka Copper Gold (Contract Management) - PT Lamjaya Global Solusi - Jakarta — Jun 2022 - Nov 2022

Programmer

I was involved in the development of Merdeka Contract Management, a web-based system designed to fully digitize and streamline the entire contract management workflow within the organization. The application was built using a Laravel-based API backend, a modern Nuxt.js frontend, and PostgreSQL as the primary database.

- Contract Creation & Management: Complete contract input form with document upload and important metadata.
- Contract Review & Approval: Multi-level approval flow with revision history and notification.
- Vendor Invitation Creation & Management: Feature to create cooperation/vendor invitations, including review and approval process.
- Dynamic Report: Contract and activity report module based on certain filters (date, status, PIC)
- Role-Based Access: Access rights settings for Admin, Legal, Manager, and Vendor users.

Azuri Dental - Jakarta — Dec 2021 - Feb 2022

Programmer

I developed a company profile website for Azuri Dental, a company engaged in the distribution of medical and dental equipment. This website is designed to make it easier for potential clients to access information on medical equipment products.

File Management Korporlairud - Jakarta — Mar 2021 - May 2021

Programmer

I developed a web-based file management system using CodeIgniter 3 (CI3) that allows users to upload, manage and download files in a secure and structured manner.

PT Dharma Satya Nusantara TBK (Tax Projection) - PT Lamjaya Global Solusi - Jakarta — Oct 2025 - Dec 2025

Lead Programmer

I contributed to the development of Tax Projection, an internal system for PT Dharma Satya Nusantara Tbk, designed to monitor and project Value Added Tax (PPN) across 23 subsidiary entities in an integrated and automated manner. The system reads SPT Induk documents via OCR and combines SAP-based data to generate accurate monthly PPN projections.

- Multi-Company Monitoring: Simultaneous PPN monitoring across 23 subsidiary companies in one platform.
- OCR Extraction (SPT Induk): Automatic extraction of key PPN data from SPT Induk PDF documents into a structured database.
- PPN Projection: Monthly PPN projection combining current SAP data with the previous month's actuals.
- Restitution Monitoring: Tracks restitution status per entity, including amount filed and amount received.
- Overdue Dashboard: Alerts for restitution cases exceeding the 3-month threshold since filing date.
- Role Management: User access control based on roles (Admin, Tax Officer, Reviewer, etc.)

Education Level

Universitas Terbuka - Jakarta — Aug 2024 - Sep 2028 (Expected)

Bachelor

SMKN 12 - Jakarta — Jun 2019 - Jun 2022

Senior High School, Software Engineering

Organisational Experience

IT CLUB - SMKN 12 Jakarta — Jan 2020 - Jun 2022

Mentors

serve as a mentor in an educational organization focused on IT, networking, and design. The organization provides a collaborative learning environment where members can develop technical skills through workshops, mentoring sessions, and hands-on projects. As a mentor, I guide members in understanding core concepts, solving practical challenges, and building portfolios in areas such as web development, computer networking, and digital design.

- Designing UI/UX mockups and prototypes for websites and web applications.
- Developing responsive frontend interfaces using modern JavaScript frameworks such as Vue.js or React.
- Implementing backend logic and RESTful APIs using frameworks like Laravel, Express.js, or Node.js.
- Integrating databases such as PostgreSQL, MySQL, or MongoDB for data storage and retrieval.

Skills, Achievements & Other Experience

- **Soft Skills**: Laravel, PHP, Postgre SQL, MySQL, SQL Server, Mongo DB, Docker, Vue.js, Nuxt.js, Elysia.js, Node.js, Tesseract OCR, Redis
